# THE AiO<sup>®</sup> WALL MIRROR

The AiO Wall Mirror combines a mirror, task lighting, integrated USB ports, and fine tuned audio capability for a connected experience in your styling space.

Room Designer: Toni Sabatino Style

# THE AiO® WALL MIRROR

Perfect task lighting and a minimalist aesthetic combine in the AiO Wall Mirror, providing you with a beautiful mirror that doubles as energy-saving lighting. Its thin profile hides a wealth of technology, including a capacitive-touch

dimming switch, built-in audio, and Bluetooth® connectivity. And with lighting built directly into the mirror, installation is simple and straightforward, for a sophisticated furnishing that's built to last.

## KEY APPLICATIONS

### Bathroom

Whether it's in a bedroom, bathroom, or any other space, AiO is the ideal wall mirror for stylish, modern decor where perfect form and flawless function combine.

### Bar

Sleek and sophisticated, AiO is perfect for bars and other hospitality settings where ambience and style are central to the brand experience.

### Spa

The flawless craftsmanship of the AiO Wall Mirror is built to last and look new even in the most high-traffic applications.

# TECHNOLOGY

LUM™ LIGHTING

Compact Fluorescent: 50 CRI

Standard LED: 80 CRI

LUM LED: 90+ CRI

Capacitive Touch Control

## ONE-TOUCH TASK LIGHTING FOR YOUR BEST LOOK

LUM Lighting includes an integrated LED light, engine, and dimmer that provides high-efficiency illumination at a bright and beautiful 4000K color temperature. With smooth and continuous dimming – and no flicker, shimmer, pop-on, or buzzing – you can tune the high-quality light to create the perfect light for any task.

The elegant capacitive-touch dimming switch controls the LEDs from the mirror itself, adding convenience, and eliminating the guesswork that usually goes with pairing a LED and a dimmer.

OM™ AUDIO

OM Audio technology by Robern offers uniform sound versus directive sound from a single source speaker.

## Uniform sound – Robern

## Directive sound – Other

## TRANSFORM A MIRROR INTO AN AUDIO SYSTEM

Embedded in the AiO. Wall Mirror are invisible speakers, a sound source with high-quality resonance you can feel but can't see. OM Audio transforms your mirror, generating sound into the entire space around the mirror, versus uni-direction sound from a traditional speaker.

Available with high fidelity Bluetooth® audio that allows you to connect your smart phone device with "Robern BT01" for a quality sound experience. If prompted for a pin, enter 0000.
