The AiO Collection merges minimalist design with Robern’s most innovative features — like LUM™ Lighting, OM™ Audio, magnetic storage, and integrated USB and electrical outlets — to transform your everyday routine into an unexpected experience.

Room Designer: Strandemo and Associates
THE AiO® COLLECTION

Premium wall mirrors and medicine cabinets merge cutting edge features with exquisite Robern craftsmanship.

WALL MIRRORS
GO BEYOND THE EXPECTED.

The AiO Lighted Mirror combines thin-profile, minimalist design with flawless functionality and connectivity. LUM™ Lighting technology offers on-mirror, one-touch dimming to tailor your lighting for any task. OM™ Audio lets you connect with Bluetooth® to the embedded speakers, while integrated USB ports make it easy to recharge your technology. The result: a sophisticated furnishing that simplifies your life.
MEDICINE CABINETS
THE EVOLUTION OF ORGANIZATION.

AiO® Lighted Medicine Cabinets merge sleek design with state-of-the-art features to enhance your routine. LUM™ Lighting technology with one-touch dimming creates the perfect level of illumination, and the built-in, Bluetooth®-enabled OM™ Audio transforms your medicine cabinet into a sound system.

The moisture-resistant interior features adjustable shelves and additional lighting, along with two magnification mirrors for fine-tuning tasks. Razor holders and magnetic storage strips keep styling tools organized. This is the medicine cabinet with everything.
ONE-TOUCH TASK LIGHTING FOR YOUR BEST LOOK

LUM Lighting provides high-efficiency illumination with a 2700 or 4000K color temperature for a bright, natural feel. The integrated LED light, engine, and dimmer offer smooth and continuous dimming — no flicker, shimmer, pop-on, or buzzing.

The elegant capacitive-touch dimming switch controls the lighting from the mirror itself, adding convenience and eliminating guesswork. Simply touch and hold to find the perfect intensity for the task at hand.

One-Touch: turns lights on/off
Touch and Hold: dims and brightens
TRANSFORM YOUR MIRROR INTO A SOUND SYSTEM

Embedded, invisible speakers transform your AiO® Lighted Mirror or Medicine Cabinet into a high-quality audio system. Unlike traditional speakers that provide unidirectional sound, OM Audio lets your music resonate through the entire mirror, creating a richer, fuller audio experience.

High-fidelity Bluetooth® audio allows you to pair your smartphone device with “Robern BTO1” for a quality sound experience. If prompted for a pin, enter 0000.

OM Audio is not available for AiO Full Length Lighted Mirror.
QUALITY OF LIGHT

Discover how quality task lighting can transform your routine. The AiO Collection offers the best LED lighting output in its class — bright enough for precise tasks, dimmable for a relaxing bath, with precise color rendering and an even, consistent glow.

LED COLOR TEMPERATURE (KELVIN)
Two options help you set the perfect tone.

- **2700K** Warm White
- **4000K** Cool White
- **10000K** Bright Sun/Blue Sky

**WARM WHITE LED LIGHTING**
Warm, relaxing tones (2700K) replicate indoor light to help you unwind before bed or ease into your morning.

**COOL WHITE LED LIGHTING**
Cool, invigorating tones (4000K) simulate bright daylight to jumpstart your day and provide ideal task lighting.
COLOR RENDERING INDEX (CRI)
The AiO Collection offers remarkably accurate color rendering at 90+ CRI, so you can see your truest reflection.

LIGHT DIRECTION AND OUTPUT
The right light is achieved by a combination of high lumen output and proper placement in relation to the face and body. Robern lighted mirrors have been carefully designed (see lighting specifications below) to enable you to see yourself in the best light:

• Eliminate dark shadows
• Experience bright even task lighting
• See rich, saturated tone in your reflection
• Be confident that lighting stays consistent, even for close up tasks

Robern uses energy efficient LEDs to achieve quality task lighting:

Combining precise task lighting with a minimalist aesthetic, the AiO Lighted Mirror is an eye-catching design element that doubles as an energy-saving lighting fixture.

Its thin profile conceals a wealth of technology, including a capacitive-touch dimming switch, built-in audio, and Bluetooth® connectivity. And with lighting built directly into the mirror, installation is simple and straightforward, for sophistication that’s built to last.
